

Chief Executive Officer Eng. Petronilla Ogut addressing residents on the benefits of Bunyonyu dam

Misconception on the Project

It is **NOT TRUE** that the dam will

1. Be 1800m high.
2. Displace over 2,000 people and flood the Bunyonyu area.
3. Bring crocodiles, snakes and Hippopotamus.

Conclusion

Water is a human right as per the constitution of Kenya. Embrace the project for the good of ALL.

Support development for economic growth and prosperity. Spread the truth about the project.

Together we will build **Bunyonyu dam** for the benefit of the present and future generations.
